

Developing a Quality Improvement Plan for Community Mental Health Services Using The Ontario Common Assessment of Need (OCAN)

NICOLE KIRWAN

St. Michael's Community Mental Health Services Quality Improvement Plan

- Documented set of commitments made to service users developed on an annual basis
- Goal is to improve quality of community mental health care through focused targets and actions

St. Michael's Community Mental Health QIP

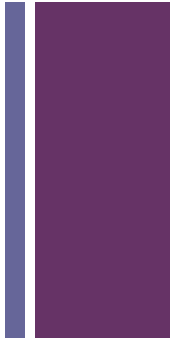

- Identify priorities to support a focused approach to improving the quality of care
- Priorities are reviewed annually and developed in collaboration with service users/service providers

St. Michael's Community Mental Health QIP

- The Community Mental Health QIP is based on the six domains of health care quality identified by the Institute of Medicine (2000)

+ St. Michael's Community Mental Health QIP

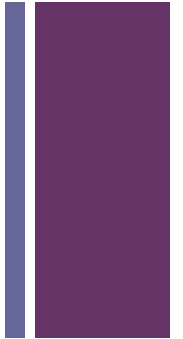

- The IOM Framework makes it easier for service users and service providers to grasp the meaning and relevance of quality
- It also helps them value a broader range of quality indicators

Q = quality

St. Michael's Community Mental Health QIP

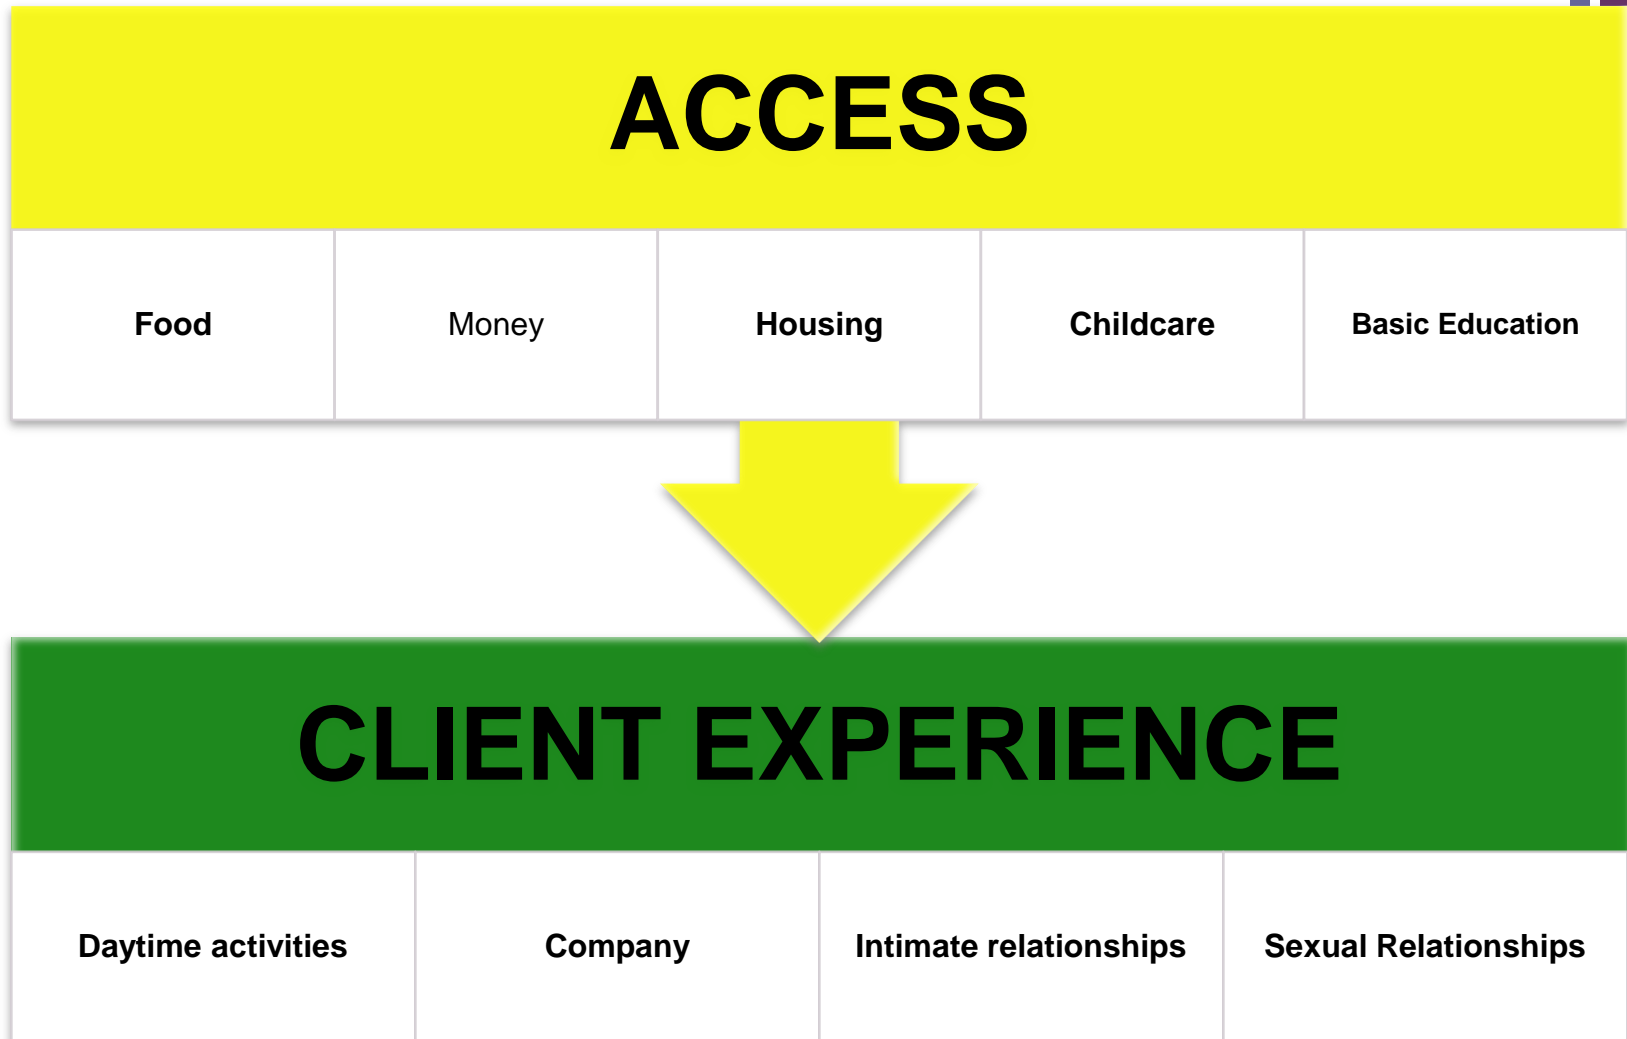

- The Community Mental Health QIP maps OCAN need domains to the six domains of quality to help service users and service providers see the meaning of quality measures more clearly
- This also helps them to understand how measures relate to what matters to them about care/treatment

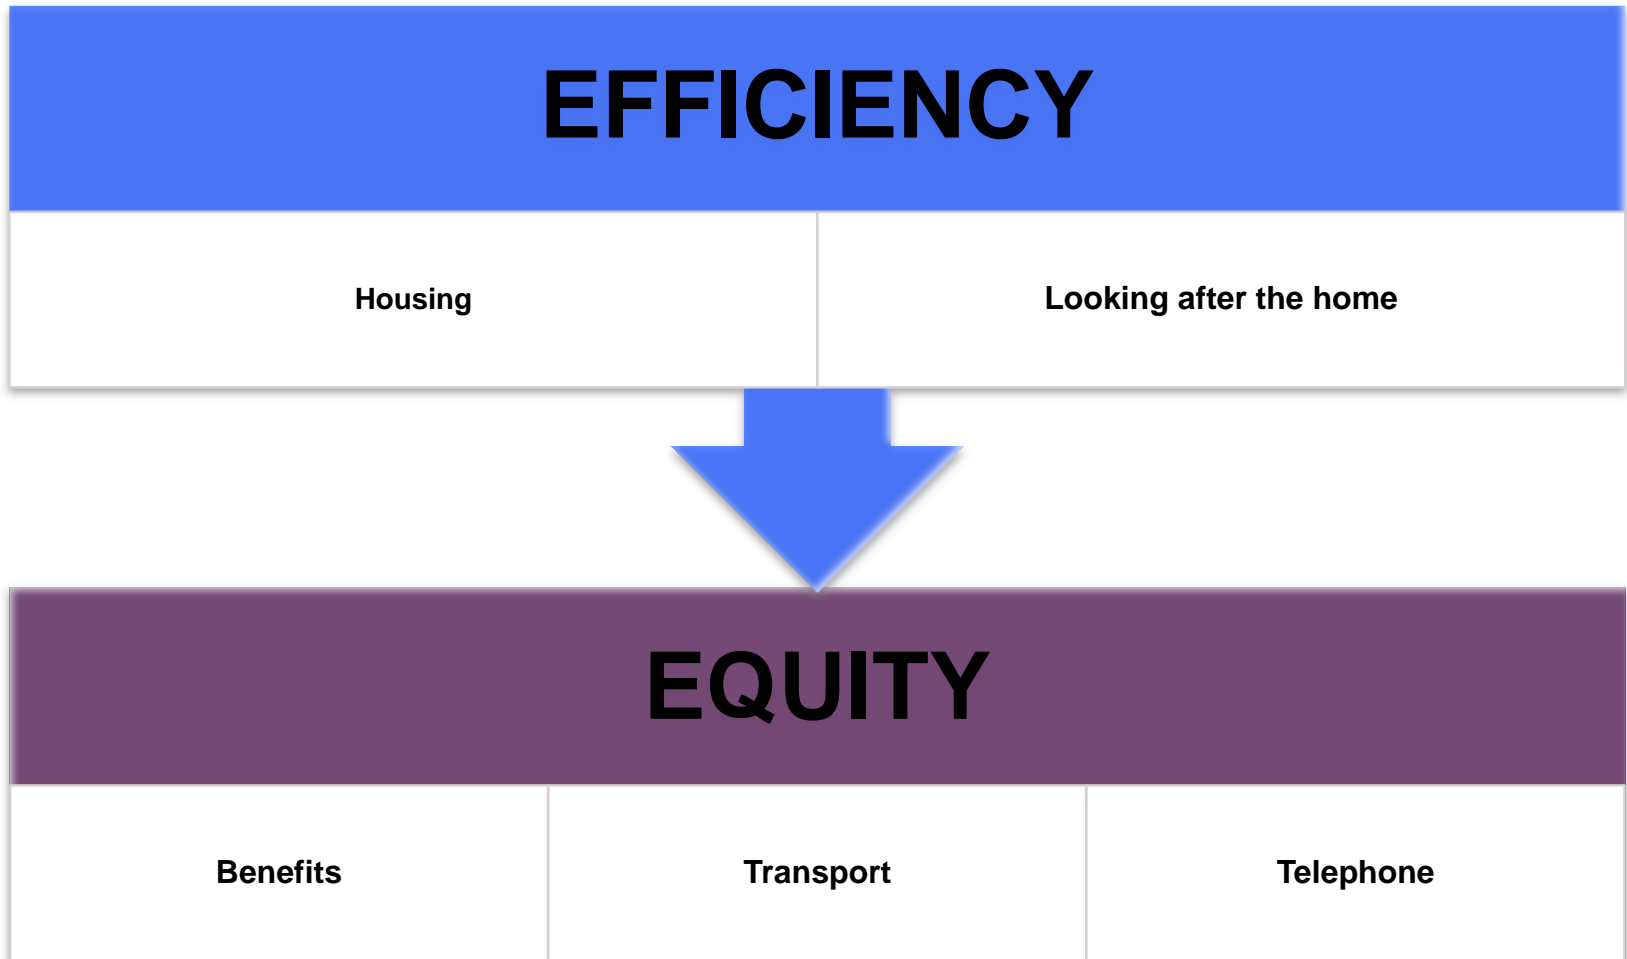

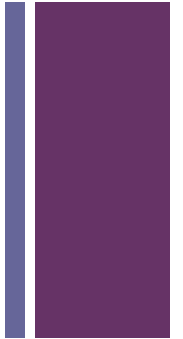

+ Domains of Quality & OCAN Need Domains

+ Domains of Quality & OCAN Need Domains

+ Domains of Quality & OCAN Need Domains

Developing the Community Mental Health QIP

- Six round table discussions are held each year in Q4 for to develop Community Mental Health QIP priorities for the next fiscal year
- Broad representation from service users and service providers is promoted
- Each round table discussion focuses on one of the six quality domains in an indepth way

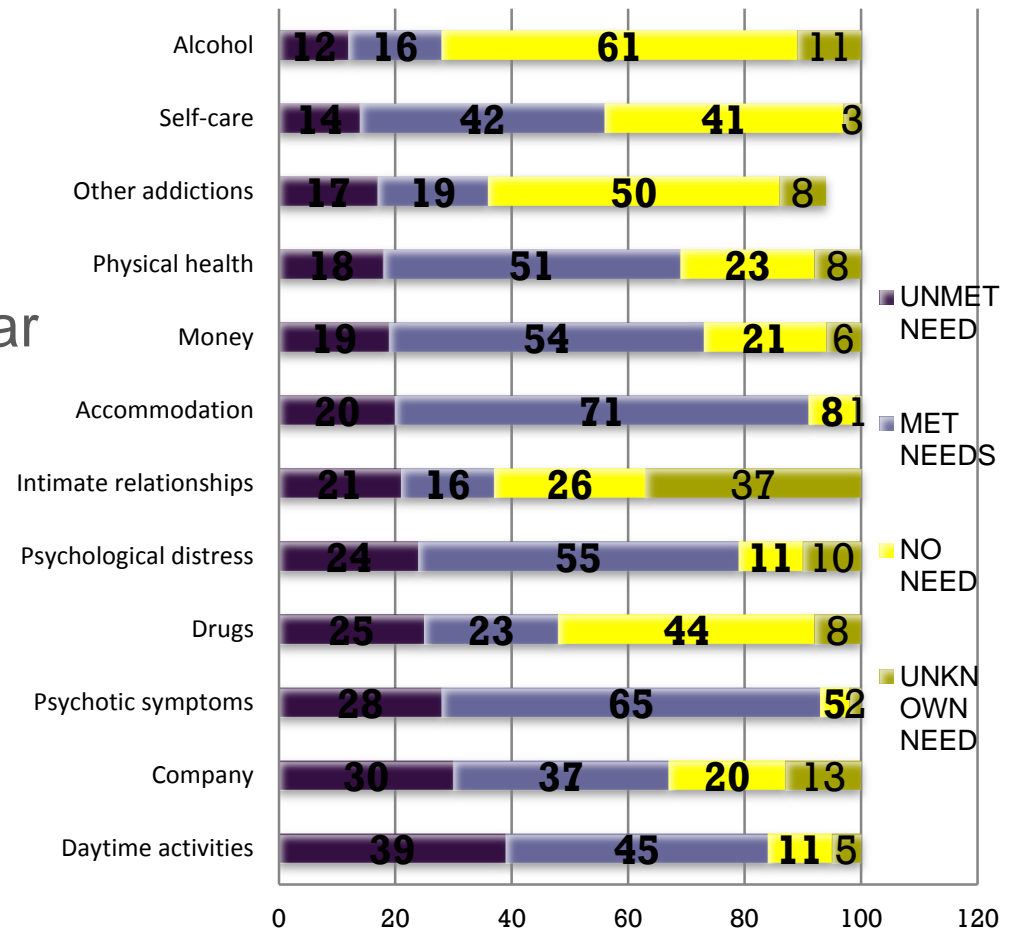

Audit & Feedback-OCAN Data

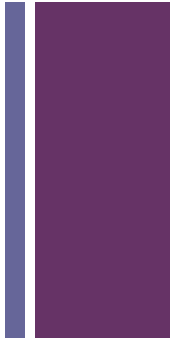

- Aggregate data from staff and consumer OCANs is shared with the group to jumpstart the discussion about quality improvement priorities for the coming year
- Areas of unmet and unknown needs
- Staff and consumer agreement about needs
- Change in consumer needs over time

Audit & Feedback-Service Utilization Data

- Aggregate data on service provider interactions is also shared with the group to identify potential areas for improvement
 - Number and average length in minutes of individual and group SPI
 - OCAN need domain focus of individual and group SPI
 - Specific interventions consumers received to address each OCAN need

Condition and Treatment

Physical health

Psychological distress

Psychotic symptoms

Housing

Alcohol/Drugs

+ Identifying QI Priorities

- Possible quality improvement priorities that service users/service providers can work on together in the next fiscal year are identified during data feedback

+ Identifying Change Ideas

- Design thinking is used to identify innovative change ideas for QI
 - What do service users want and need in their lives?
 - What do service users like and dislike about the services that are currently being offered/ delivered?
 - Reverse brainstorming- What is the “worst possible idea” for improving quality in this OGAN need domain?

+ Identifying Change Ideas

- Consumers and service providers work together to identify actionable and specific ideas for improving safety, outcomes, access, patient experience, efficiency and equity in community mental health care

+ Testing Change Ideas

- Change ideas are tested to determine whether they will result in improvements in meeting consumer OCAN needs
- Consumer/service provider teams test change ideas by running PDSA cycles to learn what works and what does not work

+ Evaluating Improvement

- Quality indicators are selected by the group to track progress and improvement
 - Structure of care
 - Processes of care
 - Outcomes of care

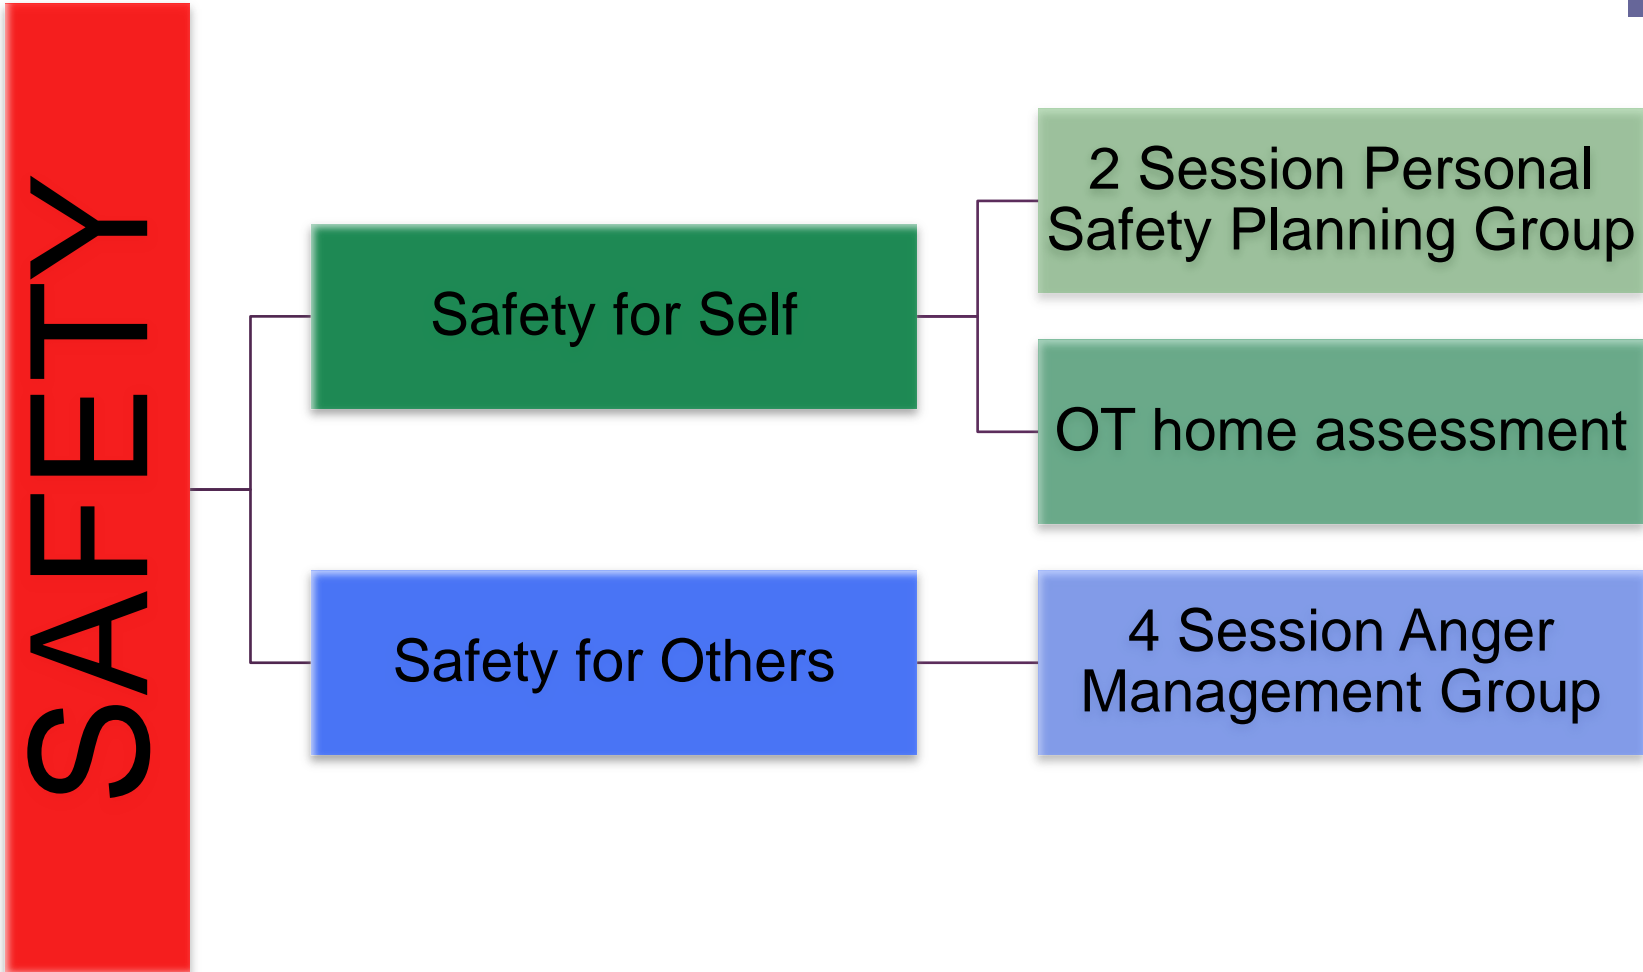

+ TRACKING PROGRESS IN QUALITY IMPROVEMENT

- A Community mental health Quality Dashboard organized by OCAN domain of need is used to track improvement
- The dashboard is regularly reviewed by service users/providers to identify areas of performance
 - Above target
 - On target
 - Below target
